

R290 Refrigerant Heat Pump Water Heater

This heat pump water heater uses R290 refrigerant for environmentally conscious operation. It provides reliable hot water while reducing energy consumption.

Product Overview

High-Efficiency R290 Heat Pump Water Heater

This advanced heat pump water heater utilizes eco-friendly R290 refrigerant to provide highly efficient water heating for both residential and commercial applications. Its compact, integrated design ensures easy installation while significantly reducing energy consumption compared to traditional electric storage units. Suitable for diverse environments ranging from single-family homes to large-scale commercial facilities like hotels and resorts, it offers a reliable, low-maintenance hot water solution.

Key Advantages

Energy Efficiency

80 %

Running Cost Reduction

Core Benefits

- Compact all-in-one design
- Compatible with harsh water quality conditions
- Operational independent of direct sunlight
- Suitable for day and night use

Tank Capacities

150L, 200L, 270L, 340L

Warranty & Support

Cylinder Warranty

5 Years
