

R410A Inverter Air Conditioner

This air conditioner utilizes R410A refrigerant and inverter technology for efficient cooling. It is designed for residential and commercial environments.

Product Overview

High-Efficiency Inverter Technology

This high-efficiency inverter air conditioner is engineered to utilize R410A refrigerant for optimal cooling performance and energy conservation. It features a sophisticated variable-speed compressor that allows for precise temperature control and exceptionally quiet operation. Designed for versatility, this unit is suitable for a wide range of residential and commercial applications, ensuring improved indoor air quality through an advanced filtration system.

Technical Specifications

Refrigerant	R410A
Compressor Type	Variable-speed inverter

Features

Key Features

- Variable-speed compressor
- Quiet operation
- Advanced air filtration system
- High energy efficiency

Applications

Suitable Environments	Residential, Commercial
