

# R410a Refrigerant Air Conditioner

This air conditioner uses R410a refrigerant. It is compatible with both mono and multi systems and features refrigerant leakage protection.

## Product Overview

### High-Efficiency R410a Split Air Conditioner

This wall-mounted split air conditioner utilizes R410a refrigerant to provide optimal cooling performance while maintaining energy efficiency. Designed with a sleek, modern aesthetic, it features a concealed digital display that remains hidden when not in use. It is engineered for both mono and multi-split system compatibility, making it a versatile solution for various installation requirements.

## Smart Features

### Key Intelligent Functions

- Refrigerant leakage detection to protect the compressor
- Louver position memory function
- 8°C heating mode for freeze protection
- Low ambient cooling capability down to -15°C

## System Compatibility

### System Compatibility

Mono-split, Multi-split, Inverter-compatible

## Performance Metrics

### Performance Highlights

**8 °C**

Min Heating Temp

**-15 °C**

Min Cooling Temp
