

R410A Refrigerant Manifold Gauge

This refrigerant manifold gauge features a special anti-collision sheath. It also has a 3/8" port designed for large systems and includes a sight glass to easily view refrigerant movement and condition.

Product Overview

Precision R410A Diagnostic Tool

The R410A Refrigerant Manifold Gauge is a precision instrument engineered for HVAC and refrigeration system diagnostics and maintenance. Featuring a durable manifold body and a special anti-collision sheath, it is built to withstand demanding job site environments. With integrated sight glass for monitoring refrigerant movement and specialized high-capacity ports, this tool provides technicians with accurate, reliable performance monitoring.

Technical Specifications

Refrigerant Compatibility

R410A

System Port Size

3/8"

Design & Features

Supported Hose Fittings

- 5/16"
- 1/4"
- 3/8"

Durability Features

Anti-collision sheath, Durable manifold body, Integrated sight glass

Convenience Features

Yes
