

R410A Refrigerant Recovery Cylinder

This refrigerant recovery cylinder is designed for R410A refrigerant. It has a pressure vessel licensing and certification of national security.

Product Overview

Professional Recovery Solution

This R410A refrigerant recovery cylinder is engineered for the safe and efficient recovery, storage, and transportation of refrigerants in HVAC/R applications. Built with durable steel construction, it features a protective collar with an integrated handle for ease of use. The unit is fully compliant with industry safety standards, including national security pressure vessel licensing and certification, and is equipped with a pressure relief device for enhanced operational safety.

Technical Specifications

Rated Pressure

400 PSI

Max Pressure

Refrigerant Capacity	13.6 kg
Cylinder Weight Class	30LB

Compliance & Safety

Certification

Pressure Vessel Licensed

Safety Features	Pressure Relief Device, Pressure Vessel Certified, National Security Certified
