

# R410A Refrigerant Recovery Cylinder

This cylinder is designed for R410A refrigerant recovery. It features a durable construction for safe and reliable refrigerant handling.

## ADDITIONAL IMAGES

## Product Overview

### Professional Refrigerant Recovery Solution

This R410A refrigerant recovery cylinder is engineered for safe, efficient handling and storage of refrigerants in HVAC&R applications. Built to withstand high pressures, it features a robust construction designed for durability and reliable performance in demanding field conditions. The unit is fully compliant with national security standards for pressure vessels, ensuring peace of mind for professional technicians.

## Technical Specifications

### Key Features

- Designed specifically for R410A refrigerant
- Durable construction for reliable handling
- Equipped with dual valves for efficient transfer
- Protective yellow and grey coating

Rated Pressure	400 PSI
Refrigerant Capacity	22 kg
Weight Class	50LB

## Compliance & Safety

Certifications	Pressure Vessel Licensed, National Security Certified
