

R410A T1 Air Conditioner Unit

This high-efficiency air conditioner unit is designed for residential or commercial use. It operates on R410A refrigerant and features a T1 compressor suitable for tropical climates, while also being compatible with 208-230V power supply at 60Hz.

Overview

Professional Cooling Solution

This high-efficiency air conditioner unit is engineered for both residential and commercial applications. Utilizing R410A refrigerant, it offers an environmentally responsible cooling solution while maintaining high performance. Equipped with a T1 compressor, it is specifically optimized for tropical climates to ensure reliable operation under demanding conditions.

Technical Specifications

Refrigerant	R410A
Voltage	230 V
Frequency	60 Hz
Compressor Type	T1

Compliance

Certifications	Brazilian Energy Efficiency Standard
