

R600 Refrigerant

Refrigerant R600 is a N-Butane refrigerant. It is suitable for use as a freezing medium in HVAC&R systems.

Product Overview

High-Performance R600 Refrigerant

R600, also known as N-Butane, is a professional-grade refrigerant widely utilized in modern HVAC&R systems. It serves as an efficient freezing medium, making it an essential component for the manufacturing of refrigerators and specialized cooling equipment. With its versatile application profile, it is also frequently used in aerosol production.

Technical Details

Safety Classification

Flammable Gas • UN 1011 • Class 2

Chemical Identity

N-Butane, R600, CAS 106-97-8

Logistics & Supply

Available Package Sizes

- 6.8 KG Cylinder
- 11 KG Cylinder
- ISO TANK

Applications

Primary Applications

- Automobile air conditioning
- Refrigeration manufacturing
- Aerosol industry
