

R6105ZQ Diesel Engine

The R6105ZQ is a robust diesel engine designed for various industrial applications. It features a four-stroke cycle, direct fuel injection, and water cooling for efficient operation and durability.

Product Overview

Robust Industrial Power

The R6105ZQ is a high-performance diesel engine engineered for reliability and durability in demanding industrial environments. It utilizes a sophisticated four-stroke cycle and direct fuel injection to ensure high power output and operational efficiency. This unit is specifically designed for integration into heavy-duty equipment, including generators, construction machinery, and agricultural tools.

Technical Specifications

Cycle Type	Four-stroke
Fuel System	Direct fuel injection
Cooling System	Water cooled

Key Components

Engine Components

- High-pressure fuel pump
- Precision fuel injectors
- Durable cylinder head

Applications

Suitable Applications	Generators, Construction Equipment, Agricultural Machinery
