

Rack Mountable Network Switch

This rack-mountable network switch is designed for professional network infrastructure. It ensures reliable data transmission and efficient network management.

Product Overview

Professional Network Infrastructure Solution

This rack-mountable network communication device is engineered for high-reliability data transmission and efficient network management. Featuring a robust design with an integrated digital display and versatile input/output ports, it is built to support demanding professional environments. The unit provides essential connectivity and control capabilities for scalable network infrastructure.

Technical Specifications

Mounting

Rack Mountable

Key Features

- Digital display interface
- Hard power switch
- High-density I/O port configuration

Model Identifier

A-2000-A

Device Type

Rack Mountable Network Switch
