

Rack Mountable Uninterruptible Power Supply

This rack-mounted uninterruptible power supply (UPS) system is designed to provide backup power in the event of a power outage. It features a display screen and control panel for monitoring and managing power conditions.

Product Overview

Reliable Rack-Mounted Power Protection

This rack-mountable uninterruptible power supply (UPS) provides robust backup power to safeguard sensitive electronic equipment during outages. Designed for efficiency, the unit features an integrated display screen and control panel for intuitive monitoring of power conditions. The sturdy cabinet architecture incorporates specialized ventilation to ensure consistent cooling and long-term reliable operation against surges and voltage fluctuations.

Key Features

Monitoring & Control

- Integrated display screen
- Advanced control panel
- Real-time power condition monitoring

Design & Form Factor

Rack-Mountable, Sturdy Cabinet Construction, Integrated Cooling System

Performance

Power Protection

Surge Protection • Voltage Fluctuation Mitigation • Outage Backup
