

Rack Mountable Uninterruptible Power Supply

This rack-mounted uninterruptible power supply provides backup power during outages. It features indicator lights and controls for monitoring and is suitable for data centers or server rooms.

Product Overview

Reliable Rack Mount Power Protection

This rack-mountable uninterruptible power supply (UPS) is engineered to deliver essential backup power during unexpected outages. Designed for high-density environments like server rooms and data centers, the unit features a durable cabinet with integrated ventilation to ensure consistent performance. Its front-facing control panel allows for easy monitoring and management, providing a dependable solution for critical infrastructure stability.
