

Radial Arm Saw for Woodworking

This radial arm saw is designed for versatile woodworking. It features a robust motor, adjustable cutting angles, and a sturdy base for stability, making it ideal for precision cutting of wood, plastics, and non-ferrous metals.

Overview

Versatile Precision Cutting

The WW2120 Radial Arm Saw is a robust woodworking solution designed for high-precision cutting tasks. Built with a powerful motor and a stable base, it offers exceptional versatility for handling wood, plastics, and non-ferrous metals. Its adjustable cutting angles make it an ideal choice for professional workshops requiring consistent accuracy and reliable performance.

Technical Specifications

Model Number	WW2120
Compatible Materials	Wood, Plastics, Non-ferrous metals

Performance

Key Features

- Robust motor design
- Adjustable cutting angles
- Sturdy base for enhanced stability
