

Radial Arm Saw for Woodworking

This radial arm saw is designed for making precise cuts in woodworking applications. It features a horizontally mounted motor and circular blade suspended on an adjustable arm for creating various angles and depths of cuts.

Product Overview

Professional Radial Arm Saw

This radial arm saw is engineered for precision woodworking and versatile cutting applications. Featuring a horizontally mounted motor and circular blade suspended on an adjustable arm, it allows operators to execute cuts at various angles and depths with ease. The unit is built on a sturdy, industrial-grade stand, ensuring stability and safety during intensive cutting tasks.

Technical Specifications

Construction

Heavy-duty stand • Adjustable arm • Integrated work surface

Adjustment Features

- Crank handle for depth adjustment
- Variable angle arm positioning
- Adjustable cutting depth

Design Type

Radial Arm Saw

Primary Application

Woodworking, Cross-cutting, Miter cutting, Bevel cutting
