

Radial Drilling Machine

This radial drilling machine is designed for drilling, reaming, and tapping operations on large, heavy workpieces. It features a vertically adjustable arm that rotates around a column, allowing the drill head to be positioned over a wide area.

Overview

High-Precision Radial Drilling Solution

This radial drilling machine is engineered for versatility and power, specifically designed to handle drilling, reaming, and tapping operations on large and heavy workpieces. It features a vertically adjustable arm that rotates around a central column, allowing for precise drill head positioning over a wide working area. With its robust construction and variable speed control, this machine delivers consistent stability and optimal performance across various materials and drill sizes.

Technical Specifications

Model Identifier	ZJ032x98
Primary Operations	Drilling, Reaming, Tapping

Performance Features

Key Performance Indicators

1 Vertical

Adjustable Arm

360 Degrees

Rotation

Control & Power

- Variable speed control
- High-torque motor
- Wide-area positioning

Construction

Build Characteristics

Robust Construction • Heavy-Duty • High Stability
