

# Radial Fan for Electrical and Exhaust Applications

This radial fan is designed for electrical and exhaust applications. The fan features curved blades for efficient airflow, a central hub for mounting, and a robust housing.

## Product Overview

### High-Efficiency Radial Fan

This radial fan is engineered specifically for demanding electrical and exhaust applications. Featuring a precision-curved blade design, it ensures optimal airflow and performance in ventilation and climate control equipment. The robust metal construction and protective finish provide long-term durability in industrial environments.

## Technical Specifications

### Design Features

- Curved blades for efficient airflow
- Central mounting hub
- Robust housing for durability

### Construction Material

Metal with protective finish

### Application Compatibility

Electrical Applications, Exhaust Systems, Air Conditioning, Ventilation Equipment
