

Radial OTR Tire for Loaders and Graders

This radial OTR tire is designed for use on loaders, graders, and other construction and mining equipment. Its aggressive tread pattern provides excellent traction and grip in challenging terrains.

Product Overview

High-Performance Off-The-Road Solution

This heavy-duty radial tire is specifically engineered for loaders, graders, and mining equipment operating in demanding environments. It features an aggressive open tread pattern designed to provide superior grip and powerful traction on challenging terrain. With a focus on durability, the tire offers robust sidewall protection and uniform groove depth to ensure consistent performance throughout its service life.

Technical Specifications

TL538S+ L5

Excellent Radial Tire for Difficult Operating Conditions

- Aggressive open tread pattern for excellent grip and powerful traction
- Uniform groove depth for outstanding traction throughout the life of the tire
- Rugged shoulder design for enhanced stability and improved sidewall protection

Engineered for difficult operating conditions with an aggressive tread for maximum grip.

Tire Classification

L5 • Radial Construction

Design Highlights

- Aggressive open tread pattern for superior grip
- Uniform groove depth for consistent traction
- Rugged shoulder design for enhanced stability
- Reinforced sidewalls for cut and abrasion resistance

Suitable Applications

Loaders, Graders, Mining Equipment, Construction
