

Radial Tire for Loaders and Dozers

This radial tire is suitable for loaders, dozers, and other heavy equipment. Its robust construction and aggressive tread pattern provide exceptional traction and durability on various surfaces.

Product Overview

TB516 E3

Versatile Radial Tire for Loaders, Dozers and other Equipment

- Wide aggressive tread design for excellent handling, outstanding traction and lateral adhesion
- Robust shoulder and enhanced sidewall offer great resistance to damage and aggression
- Tough casing construction for enhanced impact and cut resistance support

Wide, aggressive tread design engineered for superior traction and durability in off-the-road applications.

High-Performance Radial Tire for Heavy Equipment

This versatile radial tire is expertly engineered for loaders, dozers, and other heavy-duty machinery operating in demanding environments. It features a wide, aggressive tread pattern that delivers exceptional handling, superior traction, and reliable lateral adhesion. Built with a robust casing, enhanced sidewalls, and a strong shoulder, the tire provides excellent resistance against cuts, impacts, and site-related damage.

Design & Construction

Key Design Characteristics

- Wide aggressive tread design
- Enhanced sidewall protection
- Robust shoulder construction
- Tough casing for impact resistance
