

Radial Tire Repair Cold Patch

This radial tire repair cold patch is designed for effective and durable tire repair. It is constructed from high-quality rubber to ensure a secure bond and long-lasting performance.

Product Overview

Professional Grade Radial Repair

This radial tire repair cold patch is engineered for high-performance puncture maintenance on passenger vehicles, light trucks, and industrial machinery. Crafted from high-quality rubber, the patch provides exceptional flexibility and a permanent, secure bond to ensure tire integrity. It is an essential solution for maintaining safety and extending the service life of radial tires across various demanding applications.

Technical Specifications

Repair Application	Radial Tires, Passenger Cars, Light Trucks, Industrial Vehicles, Agricultural Vehicles
Material Composition	High-grade industrial rubber
Adhesion Type	Cold patch vulcanization

Quality Standards

Industry Standards
ISO 9001:2008 • GB7036.1-2009
