

Radiant Electric Space Heater

This radiant electric space heater provides warmth with its three heating elements. It is mounted on caster wheels for easy mobility and features a protective metal cage.

Product Overview

High-Efficiency Radiant Heating

This industrial-grade electric radiant heater is designed to provide consistent warmth in professional environments. Equipped with three powerful heating elements and a robust metal protective cage, it balances high heat output with operational safety. Its mobile design, featuring four integrated caster wheels, ensures easy maneuverability across workspaces, making it an essential tool for climate control.
