

Radiant Electric Space Heater with Adjustable Stand

This electric space heater provides directional heating. It features a circular radiant heating element with a reflective backing, mounted on an adjustable stand.

Product Overview

Radiant Electric Space Heater

This radiant electric space heater is designed for efficient, directional indoor heating. It features a circular heating element with a reflective backing to maximize heat output, mounted on a sturdy, adjustable stand. The integrated control panel at the base allows for convenient setting adjustments, making it a reliable solution for focused warmth in indoor environments.
