

# Radiant Infrared Panel Heater

This infrared panel heater provides radiant heat, directly warming objects and people. It features a slim profile and can be wall-mounted or used with optional floor stands for versatile placement.

## Overview

### Efficient Radiant Heating Solution

This framed infrared panel heater utilizes advanced Nano Carbon crystal heating technology to provide direct, radiant warmth to objects and people, rather than simply heating the air. Designed for both residential and commercial applications, it offers an incredibly low running cost and precise temperature management. With its slim profile and safety-focused design, it serves as an ideal solution for supplemental or primary heating in well-insulated environments.

## Technical Specifications

### Surface Temperature

**85**

Min Surface Temp

**95**

Max Surface Temp

### Waterproof Rating

IP44

### Heating Technology

Nano Carbon crystal

## Features & Control

### Control Features

- LCD display
- Weekly timer
- Optional Wifi system

### Safety Features

Overheating protection
