

# Radiant Quartz Space Heater

This is a radiant space heater designed for indoor use. It is likely portable and intended for supplemental heating in small to medium-sized rooms.

## Product Overview

### Efficient Supplemental Heating

The Radiant Quartz Space Heater is designed to provide immediate, focused warmth for small to medium-sized indoor spaces. Featuring high-efficiency quartz heating elements, this portable unit delivers instant comfort at the touch of a button. Its streamlined, curved white housing and protective metal safety grill make it an ideal, safe choice for residential or office supplemental heating needs.
