

Radiant Space Heater

This radiant space heater is designed for efficient and directional heating. It features adjustable settings and a protective metallic grid.

Product Overview

Compact and Versatile Radiant Heating

The Radiant Space Heater is a versatile heating solution designed for both desktop and wall-mounted use, providing flexible placement options for any professional or residential environment. Engineered with safety as a priority, it features a stable design, a tip-over shut-off mechanism, and a protective metallic grid. This efficient heater allows for adjustable head positioning, ensuring heat is directed exactly where it is needed most.

Performance

Key Performance Metrics

1200 W

Max Rated Power

240 V

Max Rated Voltage

Technical Specifications

Power Input Range	1000-1200W
Rated Voltage	220-240V~ 50Hz

Features

Safety Features

- Tip-over switch
- Metallic grid protection
- Power indicator light

Adjustability

- Adjustable head angle
- Desktop or wall-mount options

Compliance

Certifications	CE, GS, EMC
