

Radiant Space Heater for Indoor Use

This radiant space heater is designed for indoor use. It features adjustable heat output and a stable base.

Product Overview

Efficient Radiant Heating Solution

This radiant space heater is engineered for reliable indoor climate control, offering consistent warmth for various settings. Its design prioritizes safety with a robust protective grill covering the internal heating elements. The intuitive control interface, featuring a power switch and a dedicated rotary adjustment knob, allows for easy management of the thermal output, while the integrated base ensures steady placement during operation.

Design & Construction

Form Factor	Rectangular desktop or floor-standing unit
Safety Features	Protective Safety Grill
Stability System	Yes

Controls & Operation

Control Mechanism

- Manual Power Switch
- Rotary Heat Output Adjustment Knob
