

# Radiant Space Heater with Adjustable Stand

This dual-element radiant space heater is designed for indoor use. It features a height-adjustable stand with a circular base and a handle for portability.

## Product Overview

### Efficiency Meets Versatility

The Radiant Space Heater provides efficient indoor warmth through dual-element heating technology. Featuring a modern black finish with chrome accents, it is designed for both performance and aesthetic appeal. The inclusion of a height-adjustable stand and an integrated carrying handle ensures maximum portability and ease of use in professional indoor environments.
