

Radiant Space Heater with Adjustable Stand

This radiant space heater is designed for indoor use. It features a circular heating element protected by a metal grille and is mounted on a height-adjustable stand.

Overview

Radiant Heating Solution

The Radiant Space Heater with Adjustable Stand is a versatile indoor heating solution designed for efficient, targeted warmth. Utilizing radiant heat technology, it directly warms objects and people in its vicinity rather than just the surrounding air. With its height-adjustable stand and stable circular base, this unit offers flexible positioning to suit various indoor environments.
