

# Radiant Space Heater with Digital Controls

This radiant space heater is designed with vertical heating fins for efficient heat distribution. It features an integrated digital control panel with an LCD display for temperature and timer settings.

## Product Overview

### Radiant Space Heater with Digital Controls

This radiant space heater is designed for efficient supplemental heating in small to medium-sized rooms. It features a sleek, white aesthetic with vertical heating fins that ensure optimal heat distribution. Equipped with an integrated digital control panel and clear LCD display, users can easily manage temperature and timer settings for personalized comfort.

## Design & Build

Color/Finish	Sleek White
Heating Method	Radiant heating with vertical fins

## Control & Interface

### Control Functions

- Power On/Off
- Temperature Adjustment
- Timer Programming

Control Interface	Digital control panel
Display Features	LCD Display, Temperature Readout, Timer Settings

## Quality Assurance

### Quality Control Process

The production process adheres to standardized operations across all stages, including stamping, injection molding, silk screen printing, spraying, and assembly. Comprehensive process control is implemented to ensure high-quality finished products.
