

Radiant Space Heater with Pedestal Base

This electric space heater features a circular radiant heating element within a protective frame. Mounted on a pedestal with a multi-legged base, it offers adjustable heat settings for localized warmth.

Product Overview

Efficient Radiant Warmth

This radiant space heater is designed for localized comfort, featuring a high-efficiency circular heating element encased in a durable protective housing. Its sleek pedestal design ensures stability while allowing for easy portability throughout residential spaces. With intuitive control settings, users can easily adjust the heat output to create a cozy environment during cooler months.
