

Rail Tank Car for Liquid Transport

This rail tank car is designed for transporting liquids. It features a cylindrical tank mounted on a railway carriage, equipped with safety valves and filling/emptying connections.

Product Overview

Industrial Liquid Transport Solution

This specialized rail tank car is engineered for the safe and efficient transport of bulk liquid cargo across railway networks. The unit features a robust, high-capacity cylindrical tank design mounted on a standard railway carriage base. Equipped with essential safety valves and integrated filling and emptying connections, this car is optimized for industrial logistics and supply chain reliability.

Technical Specifications

Integrated Safety Systems

- Integrated safety valves
- Dedicated filling connections
- Dedicated emptying connections

Tank Configuration	Cylindrical tank
--------------------	------------------

Cargo Compatibility	Liquid Cargo
---------------------	--------------

Identification

Model Identifier	70XY
------------------	------

Serial Number	0511024
