

# Railway Gondola Car for Bulk Materials

This railway gondola car is designed for transporting coal, ore, building materials, and construction materials. It is also suitable for machinery equipment, steel, and timber.

## ADDITIONAL IMAGES

## Overview

### High-Capacity Gondola Freight Car

This gondola freight car is engineered for heavy-duty rail transit and bulk material transport. Designed with an open-top structure and reinforced sides, it is optimized for hauling coal, ore, and aggregates efficiently. The unit features robust coupling systems and durable structural elements suitable for demanding rail network operations.

## Technical Specifications

### Key Operational Metrics

**10.4 t**  
Metric A

**16.44 t**  
Metric B

Model Designation

C70E / 2C80B

Serial Number

167 0561 / 438 6547

## Features & Compliance

### Safety & Design

- Open-top design for easy loading
- Reinforced structural elements
- Standard railway coupling systems
- Heavy-duty construction

Primary Applications

Bulk Material Transport, Coal Hauling, Ore Transport, Rail Transit Engineering
