

# Railway Hopper Car for Bulk Materials

Railway hopper car designed for transporting bulk materials. It features a robust construction with a blue painted exterior, yellow hopper section, and detailed undercarriage.

## Overview

### Robust Railway Bulk Transport

This professional-grade railway hopper car is engineered for the efficient transport of bulk materials across rail networks. Built with a heavy-duty frame and a specialized yellow hopper section, the vehicle is designed for durability and ease of loading. It features critical safety components, including integrated access ladders and a reliable braking system, ensuring compliant and secure operations in demanding industrial environments.

## Technical Specifications

### Key Operational Data

**75 T**

Gross Capacity Index

**23 T**

Axle Load Limit

Identification Number

C7EH 4 350133

## Features

Safety and Access

Integrated Access Ladders, Manual Access Doors, Pneumatic Braking System, High-Visibility Markings
