

Railway Hopper Wagon for Bulk Transport

This hopper wagon is designed for transporting bulk goods such as coal and ore. It features a robust steel construction, a top-loading design, and a bottom discharge system for quick unloading.

Product Overview

Efficient Bulk Transport Solution

The KM70-001 hopper wagon is engineered for the reliable and efficient transportation of bulk materials across railway networks. Featuring a robust steel construction, it is optimized for heavy-duty industrial applications including the transport of coal, ore, and grain. The design incorporates a top-loading mechanism and a bottom discharge system to facilitate rapid unloading operations.

Technical Specifications

Model Number	KM70-001
Capacity Class	70 tons
Loading Method	Top-loading
Unloading Method	Bottom discharge

Safety & Performance

Braking System	Pneumatic brakes
Suspension	Durable heavy-duty suspension

Applications

Suitable Cargo	Coal, Ore, Grain, Bulk Commodities
