

Railway Oil Tanker Car

This specialized railway tanker is engineered for transporting oil and petroleum products. Its cylindrical tank ensures optimal volume and stability during transit, with safety features and robust undercarriage components for secure rail transport.

Overview

Industrial Railway Oil Tanker

This specialized railway tanker is engineered specifically for the safe and efficient transportation of oil and petroleum products. Featuring a robust cylindrical tank design, it ensures optimal volume capacity and superior stability during transit. The exterior is finished with thermal management considerations, making it a reliable solution for heavy-duty industrial applications within the global oil and gas sector.

Technical Specifications

Model Identification	90422001
Series/Class Code	BA3TM

Design & Features

Safety Features

Thermal Management Exterior • Robust Undercarriage • High-Visibility Markings

Tank Shape	Cylindrical
Application Suitability	Oil Transport, Petroleum Products, Heavy-Duty Industrial
