

# Railway Passenger Car Bogie

This is a railway passenger car with a blue and white exterior, featuring multiple windows and a red stripe. The car is equipped with bogies and is positioned on a track.

## Overview

### Railway Passenger Car Bogie

This railway passenger car bogie is engineered for stability, comfort, and reliable performance in passenger transport applications. Designed to support the structural integrity of the carriage while ensuring smooth operation on tracks, this component is essential for modern rail infrastructure. It features a robust construction suitable for standard passenger car configurations, including the YW-72288 series.

## Technical Specifications

### Application

Passenger Transport • Railway Rolling Stock

### Series Identifier

YW-72288

### Component Type

Railway Passenger Car Bogie
