

# Rain Gauge with 35mm Capacity

This rain gauge is designed for accurate measurement of rainfall up to 35 millimeters. It is constructed from durable, weather-resistant plastic and includes a funnel to collect rainwater.

## ADDITIONAL IMAGES

## Product Overview

### Professional Rain Measurement Solution

This cylindrical rain gauge is engineered for accurate meteorological observations in various environments, including gardens, farms, and weather stations. Constructed from durable, weather-resistant clear plastic, it ensures reliable performance in outdoor conditions. The wide funnel design efficiently collects rainwater, while the clearly printed graduated markings provide easy and precise measurements up to a 35mm capacity.

## Technical Specifications

### Maximum Capacity

**35 mm**

Measurement Capacity

### Design Features

- Wide collection funnel
- Graduated side markings
- Black protective cap
- Integrated handling ring

### Material

Clear Plastic, Weather-resistant

## Usage

### Recommended Use Cases

- Meteorological observations
- Environmental monitoring
- Agricultural and farm management
- Home garden maintenance
