

Random Orbital Sander with Dust Collection

This random orbital sander features a dust collection bag for efficient dust removal. The ergonomic design ensures comfortable handling during extended use and the pad allows for quick abrasive paper changes.

Product Overview

Professional Performance Sanding

This random orbital sander is designed for efficient material removal and smooth surface finishing across a variety of applications. It features integrated dust collection to maintain a cleaner workspace and an ergonomic design for improved operator comfort during extended work sessions. With versatile speed control and a quick-change abrasive system, this tool is built for durability and ease of use.
