

Range Hood Replacement Filter Set

This set contains replacement filters for range hoods. It includes metal mesh, charcoal, and grease filters to ensure efficient ventilation.

Product Overview

Professional Grade Filtration

This comprehensive replacement filter set is engineered for high-performance range hood ventilation. Designed to effectively trap airborne grease and particulate matter, these filters ensure optimal airflow and a cleaner, safer kitchen environment. The collection includes high-durability metal mesh and specialized charcoal filters compatible with various standard ventilation systems.

Compatibility

Supported Models

AK152, CF152, CF120, AF31, CF160, CF110

Technical Details

Filter Technologies

- Metal Mesh Filters
- Charcoal Filters
- Grease Trapping Filters

Performance Focus

Grease Trapping • Air Purification • Ventilation Efficiency
