

# Rapid Coupling Clamp

This rapid coupling clamp is designed for quick and secure pipe connections. It is constructed from stainless steel and meets EN877 standards.

## ADDITIONAL IMAGES

## Product Overview

### Industrial Rapid Coupling Clamp

This stainless steel rapid coupling clamp is engineered for secure and efficient pipe and hose connections in demanding environments. Featuring a robust construction with an integrated rubber gasket, it ensures a tight, leak-proof seal for various industrial, automotive, and plumbing applications. The design utilizes a threaded bolt and nut mechanism for easy installation, adjustment, and removal, significantly reducing downtime and labor requirements.

## Technical Specifications

Material Composition	Stainless Steel
Sealing Method	Rubber Gasket
Clamping Mechanism	Threaded bolt and nut

## Performance Features

Key Performance Attributes	Leak-proof, Quick Install, Adjustable Force, Durable, Corrosion Resistant
----------------------------	---

## Applications

### Industry Compatibility

- Industrial Piping
- Automotive Systems
- Plumbing
- Commercial Maintenance
