

Ratchet Cable Cutter

This heavy-duty cable cutter is designed for cutting copper and aluminum cables. It features a ratchet mechanism for efficient cutting with minimal effort and precision-ground blades for clean, accurate cuts.

Overview

Professional Ratchet Cable Cutter

This heavy-duty ratchet cable cutter is engineered for precision cutting of copper and aluminum cables up to 32mm in diameter. Featuring high-quality forged CRV alloy steel and specialized heat treatment, it ensures long-lasting durability and sharp, clean cuts. The ergonomic bi-material handle design significantly reduces hand fatigue, making it an ideal tool for electrical contractors and technicians.

Key Performance

Cutting Capacity

32 mm

Max Outer Diameter

1.25 in

Max Outer Diameter

Material & Construction

Blade Treatment

Special Heat Treated • Precision Ground

Blade Material

Precision forged CRV alloy steel

Handle Construction

PP + TPR bi-material

Technical Features

Cutting Mechanism

Ratchet mechanism for minimal effort

Compatible Materials

Copper (CU), Aluminum (AL)

Ergonomics

Design Benefits

- Ergonomic bi-material handle
- Comfortable grip for extended use
- Reduced hand fatigue design

Applications

Recommended For

Electrical Contractors, Technicians, DIY Enthusiasts
