Product Overview

Professional Ratchet Jack Stands

These heavy-duty ratchet-style jack stands are engineered for reliable vehicle support after lifting. Featuring a unitized frame construction and a self-locking ratchet mechanism, they offer fine height adjustment and double-locking protection for enhanced safety. Designed with large saddle areas and wide feet to resist sinking into asphalt, these stands are essential for automotive repair and maintenance environments.

Key Features

Core Features

Ratchet Mechanism, Double Locking Protection, Unitized Frame Construction, Ductile Iron Rack, Solid Steel Handle
