

# Ratchet Style Jack Stands

These heavy-duty jack stands use a ratchet mechanism for secure height adjustment when supporting vehicles. They are ideal for automotive maintenance and repair.

## ADDITIONAL IMAGES

## Product Overview

### Heavy-Duty Ratchet Jack Stands

These ratchet-style jack stands are designed for secure vehicle support following a lift. Featuring a double-locking mechanism and a unitized frame construction, they provide reliable safety for automotive maintenance and repair. The large saddle and wide base feet are engineered to resist sinking into asphalt, ensuring stability in various working environments.

## Key Performance Metrics

### Load Capacity
