

Ratchet Terminal Crimping Tool

This professional-grade crimping tool is designed for secure and reliable crimping of electrical terminals. It features a ratchet mechanism that ensures consistent crimps and ergonomic handles for comfortable use.

Product Overview

Professional Ratchet Crimping Tool

The HS-38 ratchet terminal crimping tool is a professional-grade instrument engineered for secure and reliable crimping of non-insulated terminals. Designed with a high-durability ratchet mechanism, this tool ensures consistent crimping pressure for every connection. Its ergonomic build facilitates convenient operation, reducing user fatigue during repetitive electrical installation tasks.

Technical Specifications

Model	HS-38
Crimping Capacity	38 mm ²
Terminal Compatibility	Non-insulated

Performance & Durability

Service Life

30000 times
Minimum Cycles

Key Features

- Ratchet device for consistent crimping
- Rust-prevention treatment
- Point type crimping design
- Ergonomic handle design
