

Ratchet Terminal Crimping Tool

This tool is designed for crimping both insulated and non-insulated terminals and connectors. It features a ratchet mechanism to ensure reliable crimps, along with adjustable crimping force and ergonomic handles.

Product Overview

Professional Ratchet Terminal Crimping Tool

The HS-14 is a high-precision ratchet crimping tool specifically engineered for nickel terminals. It features a reliable indent crimping mechanism to ensure consistent electrical connections in demanding applications. Its robust design and ergonomic construction make it an ideal choice for professionals requiring a dedicated tool for line press caps and terminal work.

Technical Specifications

Crimping Range	14 mm ²
Minimum Wire Capacity	5.5 mm ²
Crimping Type	Indent crimping

Physical Attributes

Tool Length	280 mm
Weight	0.47 kg

Packaging

Packaging Type
Blister card

Features

Core Features	Ratchet Mechanism, Dedicated for Nickel Terminals, Consistent Crimping
