

Ratchet Terminal Crimping Tool

This tool is designed for reliable crimping of electrical terminals. It features a precision ratchet mechanism for consistent crimps and ergonomic handles for comfortable use.

Product Overview

Professional Ratchet Crimping Solution

The HS-22 Ratchet Terminal Crimping Tool is a professional-grade solution designed for precise and consistent crimping of non-insulated terminals. Engineered with an integrated ratchet device, it ensures reliable operation and reduces user fatigue during repetitive tasks. Its durable construction is built to withstand high-volume use, offering a lifespan of more than 30,000 cycles.

Technical Specifications

Crimping Capacity	25 mm ²
Minimum Capacity	5.5 mm ²
Terminal Type	Non-insulated (Point type)
