

Razor Flat Indoor TV Antenna

This indoor TV antenna features high-tech circuitry in a super-thin body. Multiple positioning options allow ease of signal reception.

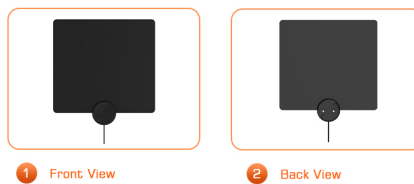

Overview

Razor Flat Indoor TV Antenna

This high-performance indoor TV antenna features advanced circuitry within a ultra-slim, paper-thin body to deliver clear, high-definition broadcast signals. Designed for household versatility, it supports UHF and VHF frequencies while effectively blocking interference from 4G LTE and 5G networks. With its discreet profile and multiple mounting options, it provides an ideal solution for accessing free local over-the-air channels.
