

RCA Audio Video Cable

This A/V cable transmits audio and video signals between devices using 2RCA plugs on each end. It is commonly used to connect DVD players, VCRs, and older gaming consoles to televisions or stereo receivers with color-coded connectors.

Product Overview

Professional A/V Connectivity

This RCA Audio Video cable is designed to facilitate reliable signal transmission between home entertainment devices. Featuring dual RCA plugs on both ends, it is an ideal solution for connecting legacy equipment such as DVD players, VCRs, and gaming consoles to televisions or stereo receivers. The color-coded connectors ensure intuitive installation and secure, stable connections for consistent audio and video performance.

Technical Specifications

Connector Type	2RCA to 2RCA
