

Real-Time GPS Guard Tour System with Fingerprint Verification

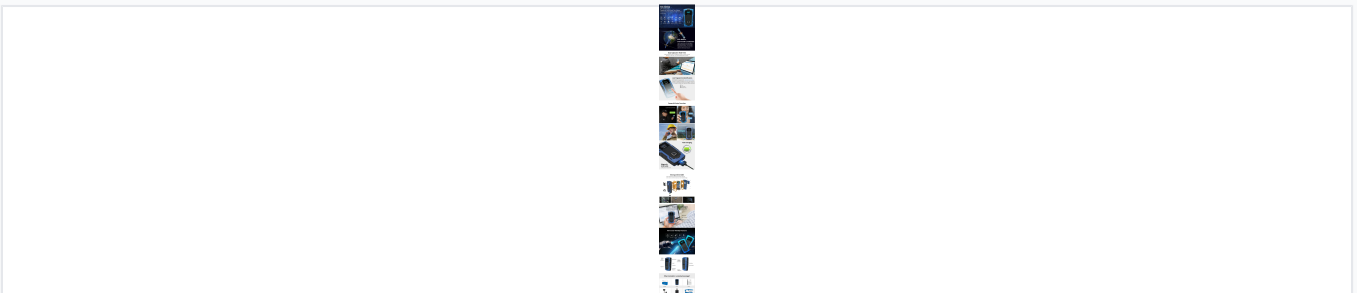

This electronic guard tour system is designed for security personnel to monitor and record patrol routes. It uses GPS and fingerprint verification for real-time tracking and accurate reporting of patrol activities.

ADDITIONAL IMAGES

Overview

The system combines 4G connectivity, GPS+Beidou positioning, and live fingerprint verification for total patrol accountability.

Advanced Real-Time Guard Monitoring

This 4G real-time guard tour system integrates GPS and Beidou dual-mode localization for high-precision tracking and accountability. Featuring third-generation live fingerprint verification, it ensures that only authorized personnel can log patrol data, eliminating proxy clock-ins. The rugged IP67-rated design and comprehensive safety features like SOS and man-down alarms make it an essential tool for demanding security environments.

Core Functionality

Key Features

16

Integrated Functions

3400 mAh

Battery Capacity

4 G

Network Support

Tracking & Communication

Voice & Audio Functions

- 4G HD Voice Calls
- Custom Voice Task Prompts
- Operating Voice Prompts
- Alarm Clock Reminders

Localization Technology

GPS, Beidou, Dual-mode Positioning

Security & Verification

Biometric Authentication

Third-generation living fingerprint recognition module

Verification Modes

Once Verify, Multiple Verify, Close Mode

Durability & Build

Protection Rating

IP67 • Waterproof • Dustproof

Safety Features

Safety & Utility Alerts

- SOS Emergency Button
- Impact Detection
- Man-down Alarm
- Pedometer

Data & Management

Remote Management

- Remote parameter settings
- Wireless checkpoint updates
- Firmware updates without USB cable

Data Transmission

Real-time 4G upload to management center with map display

Package Contents

Included in Box

Reader, Magnetic USB Cable, Charger, Software, Manual
