

Rear Bicycle Hub with Quick Release Skewer

This is a rear bicycle hub designed for easy wheel removal and installation, thanks to its quick-release skewer. The hub facilitates smooth rotation and efficient power transfer from the drivetrain.

Product Overview

High-Performance Rear Hub

This rear bicycle hub is designed for reliable performance and easy maintenance. Featuring a quick-release skewer mechanism, it allows for rapid wheel removal and installation without the need for specialized tools. Engineered for smooth rotation and efficient power transfer, this component is an essential upgrade or replacement part for your bicycle's rear wheel assembly.

Technical Specifications

Attachment Method

Quick Release

Key Functionality

- Smooth wheel rotation
- Efficient power transfer
- Tool-free wheel removal

Component Type

Rear Bicycle Hub

Color Scheme

Silver Hub Body, Black Freehub Body
