

Rear Shock Absorber for Santana Vehicles

This rear shock absorber is designed for Santana vehicles. It provides superior damping and control for a smooth and comfortable ride.

Product Overview

High-Performance Rear Suspension Solution

This rear shock absorber is precision-engineered specifically for Santana vehicles, providing superior damping control for a smooth and comfortable ride. Designed to meet or exceed OEM specifications, it restores optimal suspension performance while reducing body roll. Built with durable materials and advanced technology, this unit ensures improved handling and enhanced driving safety.

Technical Specifications

Vehicle Application	Santana
Component Type	Rear Shock Absorber

Performance Features

Quality Certification	OEM Specification Met
Performance Advantages	Enhanced Stability, Reduced Body Roll, Improved Handling, OEM Compliant
